

# **MAA Summer Conference 2024**

eTicketing/CONNEX Review

# Why eTicketing?

- Streamlines operations and improve efficiency
- Enhances transparency and reduces administrative burdens
- Eliminates the need for physical storage, printing, and shipping of documents
- Reduces the risk of errors by removing manual processes and improves accuracy in document management
- Ensure the integrity and security of documents, reducing the risk of fraud and unauthorized alterations
- Provides real-time visibility into ticket status and material quantities

# Ticket APIs for 3rd Party Integration

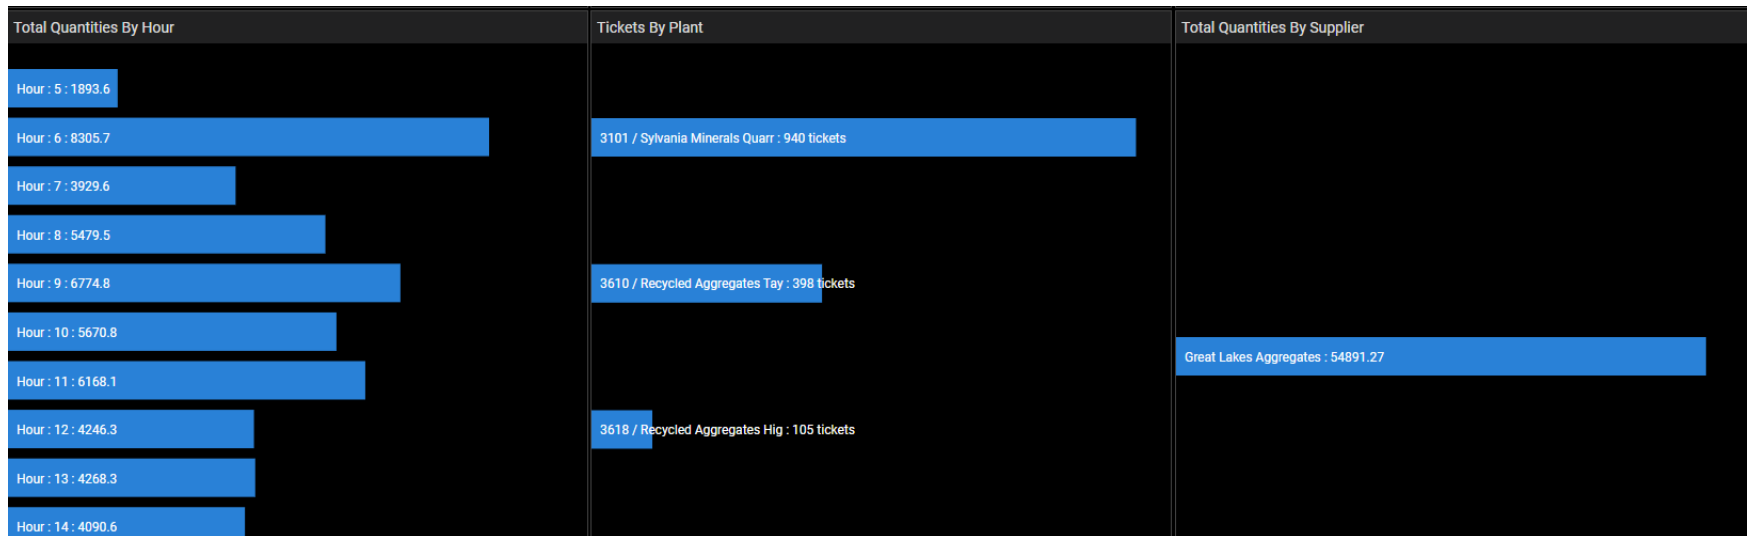

The screenshot displays the API Reference page for 'Create a Billable' in the Command Alkon v4.0 interface. The page is structured as follows:

- Navigation:** Includes a 'Log In' button in the top right, a search bar, and a breadcrumb trail: Home > Guides > API Reference.
- Left Sidebar:** A 'JUMP TO' section with a 'CTRL-F' search icon. Under 'BILLING SERVICE', the 'billables' category is expanded, listing several endpoints with their respective HTTP methods (POST, GET, PUT).
- Main Content Area:**
  - Title:** 'Create a Billable' with a POST method indicator.
  - URL:** `https://api.us.commandalkon.io/v4/services/billing/{entityRef}/billables`
  - Test:** A section for testing the endpoint.
  - PATH PARAMS:** A table with one entry: `entityRef` (string, required) with the description 'Client Entity GUID'.
  - QUERY PARAMS:** A table with one entry: `changedByProfileRef` (string) with the description 'The identifier of the user creating the billable'.
  - BODY PARAMS:** A table with three entries: `status` (string, dropdown menu), `customerId` (string), and `customerName` (string).
- Right Sidebar:**
  - LANGUAGE:** Selections for Shell, Node, Ruby, PHP, and Python.
  - AUTHORIZATION:** A 'Header +1' section with two entries: `x-api-key` and `token`, each with a lock icon.
  - URL:** A 'Base URL' dropdown set to `https://api.us.commandalkon.io/v4/services/billing/`.
  - CURL REQUEST:** A code block showing a curl command and a JSON body example for the request.
  - EXAMPLES:** A section for examples, currently empty.

# Workspace (Exec. Dashboard w/ KPIs)

# Workspace (Exec. Dashboard w/ KPIs)

# Outcomes

- Live Data Access 24/7
- User Friendly, Easy to Use Application in the Field
- Greatly Enhanced Transparency and Reduced Calls Between All Parties
- Got Rid of Time-Consuming Manual Processes of Ticket Reconciliation
- Paperless Process – No Missing Tickets
- Improved Safety at the Jobsite
