

# MAA/AIS 2025 Annual Safety Training

## Mine Safety Refresher Training

The Michigan Aggregates Association (MAA) has once again partnered with AIS Construction Equipment to provide you and your employees valuable (and required) annual mine safety refresher training.

This year the annual refresher training topics will include a review of **2024** fatalities, proper fall protection requirements, confined space precautions, basic first aid training, and a variety of other topics.

## Certified CPR/First Aid Training

For those individuals that require more than the basic first aid training that is offered in the annual safety refresher training, several CPR/First Aid Training classes are also available. These classes provide annual mine safety refresher training but also offer the ability to receive certified CPR and first aid training.

The MSHA first aid standard states:

### 30 CFR 56.18010 First Aid

*An individual capable of providing first aid shall be available on all shifts. The individual shall be currently trained and have the skills to perform patient assessment and artificial respiration; control bleeding, and treat shock, wounds, burns, and musculoskeletal injuries. First aid training shall be made available to all interested miners.*

**First Aid cards are valid for 2 years and CPR cards are valid for 2 years.**

### As a reminder...

Each company must update their training plans to reflect Michigan Aggregates Association as the competent training organization, and this updated plan must be posted for the employees to view at least two weeks before the training. If you need assistance updating your plan, please contact the MAA office. Each aggregate production facility must also address any changes at their location that affect the safety and health of the workers in order to comply with MSHA regulations.

Training certificates will be completed at the end of each session, but companies must be aware that, *to be valid, the certificate must be signed by the person who is responsible for the company's safety and health.* MAA/AIS will not be responsible for lost certificates.

**MAA and AIS Construction Equipment are dedicated to safely advancing and promoting the industry.**
